Subject: Requested FMC Documents

Dear Jennifer:

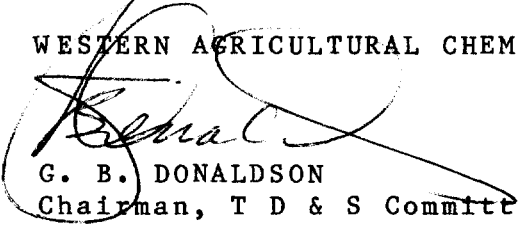

Pursuant to your request for additional documentation from Mr. Slatterly, FMC Corporation, testifying on behalf of the Western Agricultural Chemicals Association at the Los Angeles hearing on the proposed Hazard Communications Standard, please find the attached.

As I remember, you were inquiring if FMC's OSHA #200-S documents could be provided to support our testimony that effective hazard communication programs have been utilized by our industry for years. Also included are two of the documents Mr. Slatterly referred to which are also a part of their communications program for production employees.

We hope the documents will be useful in your deliberations. Should you need further clarification, please do not hesitate to contact us.

Sincerely yours,

WESTERN AGRICULTURAL CHEMICALS ASSOCIATION

G. B. DONALDSON  
Chairman, T D & S Committee
